AN ORDINANCE OF THE CITY OF XXXXXX
ADDITIONAL CHAPTE R X.XX TO THE XXXXXX
MUNICIPAL CODE TO PROHIBIT THE USE
AND DISTRIBUTION OF POLYSTYRENE
FOAM FOOD WARE AND CERTAIN OTHER
POLYSTYRENE FOAM PRODUCTS,
AND PROHIBITING POLYSTYRENE FOAM
PRODUCTS IN BEACHES AND PUBLIC PARKS

WHEREAS, the City of XXXXXX has a duty to protect the natural environment, the economy, and the health of its citizens;

WHEREAS, polystyrene foam, commonly but often incorrectly referred to as “styrofoam,” is an environmental pollutant that is commonly used for packaging and as food service ware in the City;

WHEREAS, due to the physical properties of polystyrene foam, the U.S. Environmental Protection Agency states that “such materials can have serious impacts upon human health, wildlife, and aquatic environment, and the economy”;

WHEREAS, polystyrene foam, a lightweight petroleum-based plastic material, is commonly littered or blown out of trash receptacles and migrates to the storm drain system and eventually to the ocean and beaches;

WHEREAS, littered polystyrene foam is difficult to clean up and litters the environment;

WHEREAS, polystyrene foam breaks down in the marine environment into smaller pieces, which are non-biodegradable and which negatively impact water quality and harms marine life that often mistake pieces of polystyrene for food;

WHEREAS, the World Economic Forum has found an increasing rate of plastics entering the oceans and predicts that, without significant action to reduce that flow, by 2050 there will be more plastic than fish in our oceans, by weight. According to the report, most of these plastics come from packaging, including food and beverage containers, and much of these plastics are made from polystyrene foam;

WHEREAS, polystyrene foam food ware and packing materials constitute a significant source of litter in the City’s streets, parks, and public places, and the cost of managing this litter is substantial;

WHEREAS, polystyrene foam is difficult or impossible to recycle, as it is easily contaminated and difficult to sort, and is not compostable;
WHEREAS, the reduction of food soiled polystyrene foam food ware may advance waste stream reduction and reduce the presence of this non-biodegradable material in landfills;

WHEREAS, polystyrene contains a chemical used in the production process called “styrene” that has been linked to cancer as well as reproductive and developmental disorders by the National Research Council, and that leaches from polystyrene into food and drink, according to the Styrene Information Research Center, whose membership consists of approximately 95% of the North American styrene industry;

WHEREAS, due to these concerns, more than 100 U.S. cities have enacted ordinances banning or restricting the sale and/or use of polystyrene foam food ware and/or packing materials, and many local businesses and national corporations have successfully replaced polystyrene foam and other non-biodegradable food ware and packing materials with alternative, cost-competitive products; and

WHEREAS, restricting the use of polystyrene foam food ware and other polystyrene foam products will protect the public, health, and safety of the City’s residents, as well as its natural environment, beaches, waterways, and wildlife.

The XXXXXX City Council hereby ordains as follows:
